AB	The title compn. consists of a light-sensitive azo compd. and a diazo stabilizer (I; R1 = alkyl; R2 = H, 4-tolyl) in a vinyl copolymer film. The presence of I in the film improves its thermal stability and resistance to air oxidn. Thus, triethylene glycol diacrylate in presence of 1 wt. % of 1-(4-vinylphenyl)-3-ethyl-3-phenyltriazene and 0.2 wt. % of 2,4,4-trimethyl-2-phenylazovaleronitrile was polymd. to 0.1 mm layer in the absence of air, exposed to 40-W Hg lamp radiation at 5 cm for 2 min through a neg. mask, and developed with ether to give a relief image.				
ST	photosensitive azo compn photoduplication; diazo stabilizer azo photoduplication
